

Software Engineer

Mohammad Ahmad | 0543812415 | mohammadahmadwork@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

- Software Engineer, hold B.Sc. degree in Information Systems Engineering with **GPA 80**, have a variety of technological certifications: AWS, system design and DevOps.
- looking for my first challenge in the high-tech industry.
- Proven hands-on experience delivering **Full-Stack production** systems used by real users, from requirements to deployment, **Personal & open-source projects**.
- **Experienced and high skilled with:** C#, .NET, SQL, NoSQL, C++, Java, Python, RESTful APIs, Cloud AWS, GitHub, Git, DevOps, Agile methodologies, System design, React, Flutter, Solid Principles, CI/CD, Docker, Microservices.
- Self-learner, detail-oriented, fast learner, adaptable, strong problem-solving ability, teamwork & team collaboration.

Work Experience

2025-present: Software Engineer for small business, [Portfolio](#).

Key role:

- Took ownership of full system lifecycle, from requirements gathering and design to development, deployment, and post-release maintenance.
- Worked directly with clients to gather requirements and translate them into technical system designs and features.
- Designed and developed full-stack web applications for hundreds of users Weekly, including booking and product purchasing systems used in production with active users, team collaboration.
- **Worked with modern technologies including** C#, .NET, SQL, REST APIs, JavaScript, React, Flutter, Firebase, and Git/GitHub, API Integrations, GCP (Google Cloud).

Personal Projects

- Hands-On Backend Projects (Personal Learning Projects) – [GitHub](#)
Built multiple backend applications with a focus on clean architecture, RESTful APIs, CRUD operations, authentication, and full data workflows. Designed system logic, database Design and structures, and implemented validation, error handling, and documented APIs. **Tech stack:** C#, .NET (Core & Framework), EF Core, ADO.NET, SQL Server, SQLite, REST APIs, Postman, OpenAPI, Monolithic.
- Open-Source Contributions: Contributed to [faker-cxx](#), a C++ library for generating realistic test data. Implemented new Features and data generators, added unit tests, fixed bugs, and improved documentation.
Tech stack: C++

Education

2022-2026: B.Sc. Information Systems Engineering - Ramat Gan Academic College, GPA 80.

Courses: Algorithms, Operating systems, OOP, Databases, Data structure.

Training and Certifications

2026: AWS re/Start – Amazon Web Services Cloud Practitioner Training.

Learning: foundational AWS services, Cloud, Linux, Python, networking, and security, acquired hands-on experience with cloud-based infrastructure, scripting, and troubleshooting, prepared for the AWS Certified Cloud Practitioner exam and developed practical skills for real-world cloud environments.

2025: GitHub Foundations Certification – GitHub.

Languages: English- Fluent | Arabic-Native | Hebrew-proficient
